

DYNAMIC PROGRESSIVE TREATMENT

DESCRIPTION

A 4 weekly stages synchronized with the skin's life cycle, which completely renews itself.

ACTION

- **Phase 1:** Ageless10™ starts to work from the surface layers, protecting skin against degradation caused by light and ensuring an effective anti-oxidant action.
 - **Phase 2:** Ageless10™ works deeper down, increasing the synthesis of fibroblasts and collagen production.
 - **Phase 3:** Ageless10™ allows the upper skin cells to restart the skin self-regeneration, accelerating their own cellular turnover.
 - **Phase 4:** thanks to the action of Ageless10™, the fibroblasts can work at full speed.
- For a global anti-age action

ACTIVE INGREDIENTS

Active ingredient	Action
Ageless10™	Skin self-regeneration - Increased fibroblast synthesis with an increase in collagen production

SUGGESTIONS FOR USE

Apply morning and night, before the Restorative day cream and the Fortifying night cream to face, neck and décolleté and then massage. Follow this sequence: Phase 1 the first week, Phase 2 the second week, Phase 3 the third week and Phase 4 the fourth week.

SELLING TIPS

Multi-level, dermal-epidermal treatment that follows the skin's biorhythm to work "intelligently" and obtain the maximum results, in sequential progression.
